

From a 'typical' Carlin to a 'Tier 1' asset in two short years.

As of:

- 2006-2009 ~ 2.5 million oz
- 2011-2012 ~ 7.1 million oz
- 2013 ~ 14.1 million oz
- 2014 ~ 20+ million oz
- 2016 ~ 10 million oz @ 10 g/t¹
- 2020 ~ production @ ~ 500,000 oz/yr

¹ Goldrush strategically recategorized as underground resource.

- Footprint of system almost doubled to 7 km strike
- High grade zones expanded between 2011 resource areas
- Shallow high grade west of Red Hill
- Expansion of underground-type grades to the north
