

- **2017-2018: Under the guidance of Charles Weakly, NuLegacy executed major geochemical, geophysical and ‘wildcat’ drilling programs.**
- **Resulting in the ‘breakthrough’ analysis confirming the structural and stratigraphic connectors between the Barrick’s Goldrush/Fourmile Carlin gold systems and NuLegacy’s Red Hill Carlin gold systems which are:**
 - **On trend**
 - **Strongly mineralized systems with the same stratigraphy**
 - **With the high-grade gold at the structural confluence of high-angle faults and low-angle thrust faults within Wenban5**
- **2019-2020 objectives: Capitalize on the geologic ‘breakthrough’ by:**
 - **Testing the connectors**
 - **Priority targets are the Fourmile ‘Look-alike’ and the Rift Anticline**
