

- **Three new** highly prospective targets in 4.5 km wide by 6 km long (N-S) Rift zone
- **Hole WS18-01** confirmed **major** part of Red Hill's Carlin-style gold systems under post-mineralization basalt flows
- Numerous 'high-grade' spikes (i.e. Serena18-02c with 22.1 m of 6.59 g/t, incl. **8.7m of 16.92 g/t gold**) indicate high-grade core/feeder zones to the west³
- Iceberg – the up-dip mineralized 'exhaust' plume from Rift target zone
