## - NuLegacy Closes Private Placement -

**NOT FOR DISTRIBUTION TO UNITED STATES NEWS WIRE SERVICES  
OR FOR DISSEMINATION IN THE UNITED STATES**

**March 1, 2019 - Reno, NV** – NuLegacy Gold Corporation has completed the private placement of 350,000 common shares at C\$0.15 per share announced February 11, 2019 with a lessor to cover certain of the Company's office lease payments for 2019. The common shares are subject to a 4 month hold period expiring July 2, 2019.

***About NuLegacy Gold Corporation:** NuLegacy is a Nevada exploration company focused on discovering additional Carlin-style gold deposits on its premier district scale 108 sq. km (42 sq. mile) Red Hill Property in the prolific Cortez gold trend of Nevada.*

*To date NuLegacy has discovered the Iceberg Carlin-style gold deposits and has identified several more highly prospective exploration targets that are being drilled this year.*

*NuLegacy's Red Hill Property is located on [trend and adjacent<sup>i</sup> to the three multi-million ounce](#) Carlin-type gold deposits (the Pipeline, Cortez Hills and Goldrush deposits) that are amongst Barrick Gold's largest, lowest cost and politically safest gold mines<sup>ii</sup>.*

<sup>i</sup> The similarity and proximity of these deposits in the Cortez Trend is not necessarily indicative of the gold mineralization in NuLegacy's Red Hill Property.

<sup>ii</sup> As extracted from Barrick's Q4-2013 and Q1-2014 reports. As reported by Barrick, the Goldrush resource contains 8,557,000 indicated ounces of gold within 25.78 million tonnes grading ~10.57 g/t and 1,650,000 inferred ounces within 5.6 million tonnes grading ~9.0 g/t.
