

Targets, cont.

Carlin-style:

- *Western Slope* 2 holes
- *Avocado* 4 holes

Epithermal:

- *VIO* 6 holes

“...the Red Hill property has exactly the same stratigraphic column, controls of mineralization, geo-chemistry and high and low-angle structures that are the important conduits for the high-grade gold-bearing fluids at Goldrush...just across the valley where I worked the last four years before joining NuLegacy¹...”

Charles Weakly, BSc, District Geologist,

NuLegacy Gold Corporation, starting Jan 1, 2018; previously Chief Geologist, Goldrush Exploration, wholly owned subsidiary, Barrick Gold Corporation
